

SMD Power Inductor

Features

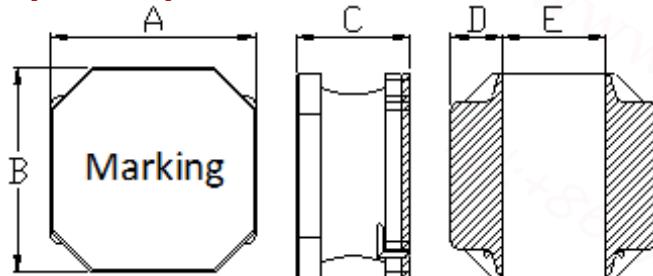

- Small and Low profile inductor
- It corresponds to High current.
- Simple and Shield structure.
- Takes up less PCB real estate and save more power
- Available tape and reel for auto insertion.
- RoHS compliant
- Halogen-Free

Applications

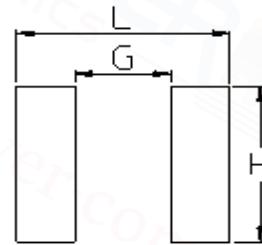

- For small DC/DC converter (cellular Phone, LCD/LED/OLED display etc).

- Inductance Tested at 100kHz, 1Vrms (20°C)
- Isat: When based on the inductance change rate (approximately 30% below in the initial value)
- Itemp: When based on the temperature increase (Temperature increase of approximately 40°C by self heating)
- Operating Temperature Range(including self temperature) : $-25^\circ\text{C} \sim +125^\circ\text{C}$

Note 1 : Circuit design, component placement, PCB trace size and thickness, airflow and other cooling. Provision all affect the part Temperature. Part temperature should be verified in the end application
